

CALIBER QUALITY ASSURANCE PROGRAM • HANDBOOK PART 1

Amendment 1

Site Quality Assurance Program Handbook – Part 1 • 2026 Edition

Document amended	Site Quality Assurance Program Handbook – Part 1, 2026 Edition
Section amended	Who Is Caliber? – accreditation statement
Effective date	2026-10-19
Approved by	Program Director

Purpose of this amendment

This amendment corrects the accreditation statement under "Who Is Caliber?". Caliber is accredited by IAS to ISO/IEC 17024 and ISO/IEC 17020; its transition to the 2026 editions of both standards is under assessment by IAS in November 2026.

No other content, process or requirement of the Handbook is changed.

Accreditation statement (replacement text)

The two bullets under "Who Is Caliber?" are replaced by the following:

- a certification body, accredited by the International Accreditation Service (IAS) to ISO/IEC 17024 (PCB-112), which certifies SPF installers; and
- an inspection body, accredited by IAS to ISO/IEC 17020 (AA-785), which performs installed product audits.

Caliber's transition to the 2026 editions of both standards is under assessment by IAS in November 2026.

Other information

All other content of the Handbook is unchanged. This amendment will be incorporated in the next edition of the Handbook.

This amendment is also available in French.
